What is NuCalm?

NuCalm is a safe, proven system that quickly relaxes you without using narcotics or controlled substances.

NuCalm naturally brings your body to the first stage of sleep. You will feel the same way you feel just as you are about to fall asleep. The amazing thing is, you feel this way for your entire appointment!

NuCalm Benefits

You will benefit from your NuCalm appointment by receiving a spa-like treatment for your mind and body, but you will also benefit from better treatment because we can now concentrate exclusively on your care and comfort

NuCalm Testimonials

What Patients Are Saying About NuCalm

"I feel completely relaxed. If it worked on me it will work on anyone." - *Gerry*

"I have a euphoric sense. I forgot a dental procedure was being done." - *Jackie*

"I am always a big chicken in the chair. Now I feel like I can have treatment with NuCalm!" - *Jennifer*

The benefits of using NuCalm include:

- You will be in a state of deep relaxation for the entire procedure
- Your body will be more receptive to treatment (natural resistance mechanisms are dulled)
- Your motor responses will be dulled - minimizing risk to you and your dentist or hygienist during the procedure
- You will be conscious and able to respond to voice commands during the procedure
- Your post-treatment experience will be a feeling of rejuvenation and relief (NuCalm helps your brain achieve cellular homeostasis which provides a neuromuscular release of bodily tension)
- Is less intrusive than sedation techniques - does not chemically compromise your central nervous system or cognitively impair your mind
- You can come and go on your own (there are no side effects, no recovery time or supervision required, and no impairments)
- Promotes better treatment because you are relaxed and still (reduced startle responses, salivary flow, and gag reflexes)
